Career Objective

Solution-oriented software professional with 8.5 years of experience in software development and consulting. Seeking to leverage expertise in .NET, C#, automation, and CI/CD to deliver scalable, high-quality solutions. Passionate about continuous learning, client collaboration, and building efficient systems that align with business goals while ensuring reliability and performance.

Skills

- Backend Development: REST APIs using .NET Core C# and MS SQL
- Test Automation: C#, Selenium, SQL Server, Page Object Model
- BDD Tools: SpecFlow, Cucumber
- Methodologies: SDLC, STLC, Agile Scrum
- CI/CD: Microsoft TFS, Jenkins, Azure DevOps, GitHub
- Database Management: SQL scripts for automation and optimization
- Client Collaboration: Requirement analysis, feasibility studies, issue resolution
- Tools: Postman, Visual Studio

Experience

Senior Consultant – Development

Jul 2016 – Present

Infogain India Pvt. Ltd.

Project: Mitchell International – Casualty Insurance Claims & Software Solutions

Roles & Responsibilities:

- Designed and implemented REST APIs for backend services, ensuring seamless integration with databases and third-party systems.
- Developed automated test cases using Selenium with C# to validate processes against baselines and generate detailed reports.
- Collaborated with US clients to analyze business requirements, assess feasibility, and propose technical solutions.
- Coordinated with cross-functional teams to resolve issues and deliver features within tight deadlines.
- Created SQL scripts to automate data migration and reduce manual effort across multiple databases.
- Implemented CI/CD pipelines using Jenkins, TFS, and Azure DevOps for build automation and deployment.
- Ensured compliance with HIPAA guidelines while working on healthcare-related projects.
- Built projects from scratch, integrating backend services and ensuring end-to-end functionality.

Strengths

- Strong programming expertise in .NET and C#
- Proficient in SQL Server and database optimization
- Skilled in debugging, troubleshooting, and delivering under pressure
- Effective communicator with clients and stakeholders
- Quick learner, adaptable to new technologies and platforms

Achievements / Certifications
