

GUNJAN TAILOR

Contact- +919983119464

Email- tailorgunjan89@gmail.com

QA engineer with over 7.5 years of experience in software industry. Solution-Oriented, centered in software testing. Ability to work efficiently under high pressure situations. I am an Inquisitive and analytical person, which also helps in quickly learning a new product or a platform.

SKILLS

- Created automated test cases using C#, Selenium and SQL server to compare the results of a process with its baseline and generate a report to describe all differences.
- Knowledge Selenium with C#, Page object model for automating testcases.
- Proficient in SDLC and STLC. Worked in Scrum agile working methodology.
- Identification of test requirements based on business requirements and creating test scenarios.
- Conducting testing in various phases of development: functional testing, acceptance testing, integration testing, performance testing, regression testing, exploratory testing.
- Coordinating with US Clients to understand feasibility, approach of a business requirement and different teams to discuss and resolve issues.
- Creating SQL scripts to reduce the manual efforts for copying and moving data on same or different database.
- Replicating the customer reported issues on local environment by exploring the production data and environment configurations.
- Creating test documents, logging all defects, and maintaining them through out different project iterations.
- Knowledge of CI/CD. Used Microsoft team foundation server for tracking bugs and tasks, triggering build and running automation. Used Jenkins for deploying builds on reporting-based web application.
- Used Postman for Web-API testing.

EXPERIENCE

JULY 2016 – PRESENT

SENOIR CONSULTANT DEVELOPMENT, INFOGAIN INDIA PVT. LTD.

PROJECT- MITCHELL INTERNATIONAL- Casualty Insurance Claims and Software Solutions.

- Well versed with the US healthcare industry, basic terminologies, Rules and HIPPA (Health Insurance Portability and Accountability Act) guidelines.
- Knowledge of end-to-end processing of medical bills.
- Tested out enhancements and issues in the bill review model, pricing model.

- Monitored code check-ins made from Dev to Int branch by executing regression daily and analyzing differences.
- Single handedly managed regression sprint- copied and restored data on release databases, deploying release builds on all release dbs. Executing regression and analyzing differences. Verifying if all the enhancements are merged completely in release branch.
- Maintaining the record of all the features delivered , issues fixed, and automation test cases executed/created in a particular release.

STRENGTHS

- Programming Languages- .NET, C#
- Databases- SQL Server
- Tools- Postman, Jenkins, Visual Studio,
- Bug/ Features tracking - Microsoft TFS
- Team Player
- Client Communication and Presentation
- Efficient in tight deadlines
- Learning new things

ACHEIVEMENTS/ CERTIFICATIONS

- Star Performer Award- Oct 2020
- Spot Award –Aug 2020, Jun 2023

EDUCATION

MAY 2016

B.TECH IT, SKIT JAIPUR

Honors degree with 74%

MAY 2011

HIGHER SECONDARY, CBSE

Secured 72% in CBSE Boards

HOBBIES

- Reading Books- Motivational and Self Help
